

Tank Mixes

Version 2008 gives users the ability to create and use Tank Mixes.

- 1) On the Inputs Tab, right click on Supplies Category and select New Tank Mix.
- 2) In the Tank Mix Properties box, enter in a Description, and Carrier. In the Format section, select either Quantity or Rate. Then fill in the Total line under the Carrier selection.

Tank Mix Properties

Description: Pre-Planting

 - Roundup Original® MAX
 - Seed

Add -->

Supply	Qty	Units
Atrazine 4L	25.00	gallons
Callisto®	25.00	gallons

OK Cancel Help

- 3) To select the supplies that will be included in the mix. Select the plus sign next to the Category, and highlight the supply. With the supply highlighted click on the Add button. Add any other supply need to complete the Tank Mix.
- 4) Enter in a Quantity amount for each supply and click Ok.
- 5) Once the Tank Mix has been created there will now be a Tank Mix Category on the Inputs Tab. To use the Tank Mix in a job add it to the Working Group and Apply to Fields.

Note: When you enter a Farming Job, you will enter the rate or total amount of the tank mix used. However all of your field records will reflect the individual ingredients that were used.
