

# Using the Show Me Button

The **Show Me** button can be helpful when analyzing application or yield maps. The following example has 3 regions in the field, all of which were different varieties. To compare the different varieties:

- Select the attribute that you want to compare in the **Views** box. (Region in this example)
- Press the **Show Me** button on the toolbar and select the attribute to be compared.
- Enter the Range to be displayed. (From: 1 To: 1, From: 2 To: 2, From: 3 To: 3)
- Farm Site will then hide all of the data except for what was specified.

- Use the **Select Tool** to highlight all of the data still shown on the map.

- View the data pertaining to the selection under the **Information** tab. Region 2

	Min	Max	Avg
<b>Region</b>	2	2	2
<b>Altitude</b>	921.9	1,045.9	949.9 ft
<b>Distance</b>	0.00	25.82	17.06 ft
<b>Duration</b>	2.0	2.0	2.0 sec
<b>Width</b>	2.49	20.01	19.99 ft
<b>Flow</b>	15.0	65.0	49.0 lbs/sec
<b>Moisture</b>	17.1	24.6	20.6 %
<b>Speed</b>	0.0	12.9	8.5 mph
<b>Mass Yield</b>	0.0	49,217.1	12,632.4 lbs/ac
<b>Wet Yield</b>	0.0	878.9	225.6 bu/ac
<b>Dry Yield</b>	0.0	812.3	211.9 bu/ac

- Repeat the previous steps to show and analyze each of the portions of the field. (All three regions in this example) Region 1 7 Region 3
- In this example, we can compare the Dry Yield for each region and see that Region 1 was the best while Regions 2 and 3 happened to be exactly the same.
- To cancel the selection and show all data again, press the **Show Me** button and choose **Make All Data Visible**.
